In case you face any difficulty in online registration or if you do not receive auto response mail within 24 hours, contact us at enq.cucet.2015@curaj.ac.in giving following specific details to enable us to provide quick resolution of the error encountered by you - (a) Registration Number (b) Your Email Id (c) Your contact telephone number (preferably your Mobile no) (d) Your Operating System

13 .CGPA Calculation As per the CBSE Standards (The students are requested to follow their respective board or University criteria for calculation percentage):

Full Form of CGPA?

Cumulative Grade Point Average.

What is CGPA?

It is an overall **indicative** percentage of marks.

How to calculate percentage from CGPA?

Multiply the CGPA with 9.5.

Why multiply with 9.5 only?

The Board took the result of the last five years and calculated the average marks of all candidates who had scored between 91 and 100. That average turned out to be close to 95 marks. Since the equivalent Grade Point for the 91-100 band (A1 grade) of marks is 10, it then divided the average result of 95 by 10. The result is 9.5.

How to Calculate Percentage from CGPA:

The CGPA is the average of Grade Points obtained in all the subjects excluding additional 6th subject as per Scheme of Studies.

An indicative equivalence of Grade Point and Percentage of Marks can be assessed as follows:

- Subject wise indicative percentage of marks = $9.5 \times \text{GP of the Subject}$.
- Overall indicative percentage of marks = $9.5 \times \text{CGPA}$.

The above formula given by CBSE to convert grades into marks and percentage is only an approximation and not exact.

Cumulative Grade Point Average is the avg. of grade points obtained in all the subjects excluding 6th additional subject as per scheme of studies.

CGPA = sum of Grade Points (main 5 subjects) divided by 5

For example => $(9+9+10+10+9)/5 = 9.4$ (CGPA)

**To calculate % from CGPA, simply multiply it with 9.5 such as,
 $9.4 * 9.5 = 89.3$ % marks.**
